ther this particular source trace can identify the target result. dedicatedFactualArmRequiredForPublication
oute 30 shots; a capture-timeout run may end earlier and contributes an event at its first timeout. A shorte
: are right-censored at shot 30; blank means survival never fell to 0.5, not that the event happened after st
bserved censoring point) is present. A WATCHDOG_ONLY run remains in the audit rows but, when it ends
. Use RQ1Runs for a run-weighted alternative; do not average already aggregated percentiles.
pe recordedFirstAnyAdmissionSkipShot is broader because a counterfactual admission-off arm also restor
as a positive observed duration; the legacy Completed field additionally requires recommendedAdmit=tru
mpMs and draftEndUptimeMs. A missing deadline stays blank; the runtime timeoutTimestampMsOrDefau
run using the same admitted-workload protocol. A Full workbook supplies factual RQ3 data for its own arm
eceding value. This keeps a 30-shot trial intact even when the runtime pacer session changes because the l
lay on the incoming transition to shot i. transitionDelayMs is blank on shot 1, and the 29 transitions for a 3
lay (NO_GATING_DECISION_ZERO, or SESSION_BOOTSTRAP_ZERO at a session boundary). A row without C
ion time. realBacklogAtReleaseMs repeats the reconstruction at decision time plus applied delay. Either va
not; realOutstandingDraftCount additionally includes a Draft already running. The AtRelease columns apply
nterpolation. A fully observed all-zero run reports 0/0; blank means insufficient observation. Run-level P50
:rnally consistent per-shot trace beyond shot 30 when an over-length run is present.
and verify the experiment manifest). Matching admission codes or aggregate admit rates alone does not pr
vall - point sum) is how much the current point clock under-prices a draft; sessionPlannedDraftOverheadIV

which grouping was used.

pent part of the window, which every earlier export is keyed on - so the two always sum to captureTimeout observations.

tory arm such as a fixed-rate or controlled-delay baseline.

3, executed workloads, and predictor learning. Values replayed on the recorded state after that point must the pacing target shot for Admission-only, and any Bokeh/Decoding/Filter/Overlay Watermark skip for Pac nory, and observed startingOverheatLevel describe the recorded trace; the requested condition and repeti n remains true for every non-recorded target so a paper does not silently promote a trace-conditioned dia or run without capture timeout is INCOMPLETE and excluded from RQ1 event aggregation.

not 30.

before 30 without capture timeout, is excluded from capture-timeout Kaplan-Meier input.

es rejected Decoding and Overlay Watermark work. captureAvailablePacing is persisted when a Draft cons ie. They intentionally differ in forced-execution traces: use recommendation for skip onset and Executed fo It getter is never used to synthesize an export-time deadline. P5 is reported only for complete deadline co n and only exact-prefix or trace-conditioned diagnostics for No-pacing.

Draft queue drains.

10-shot run are rows 2..30. cumulativeTransitionDelayMs on shot i includes all pacing cost already paid thro Draft metrics and a wholly legacy run remain MISSING and make aggregates blank rather than silently zero. alue is blank when an earlier Draft timeline is incomplete.

r the same definitions after the pacing delay.

/P95 are audit values, not values to average or pool for the final figure: aggregate the transitionDelayMs r

rove that both arms executed the same work.

Is vs overheadActualMs is the learned overhead's calibration. For a wall-based clock the blockers show up

atMs. On legacy rows carrying neither, a positive backlog deficit recovers the spent part exactly; a zero def

t be labelled TRACE_CONDITIONED_ESTIMATE, never empirical timeout data.

cing-only. Timeout reuse is stricter: the timed-out Draft must have ended before conditionalFirstDivergenc
ition number remain operator labels. A blank ReplayScope sourceTraceRequirementSatisfied means its no
gnostic to an empirical Baseline, Admission-only, Pacing-only, or RQ3 No-pacing arm. Every exported work

umes the decision that gated it, so firstPacingDelayShot is the first shot before which a positive delay was
or delivered-work/quality rates.

verage; sample and coverage columns expose eligibility.

ough the incoming transition to shot i. shotToShotWithoutRecordedPacingMs is only the measured interv
