

12MP normal-memory repeated capture: Run 30 (initial Lv4)

Selection protocol. Among 43 complete, failure-free runs, Run 30 is the only trace with pacing before Bokeh demotion, a subsequent zero-delay interval, backlog-driven pacing reactivation, and later Filter demotion.

Not a best case. Run / same-Lv4 median ($n = 10$): cumulative pacing 5.21 / 4.41 s; deadline-margin P5 0.37 / 0.43 s; 30-shot span 21.72 / 20.84 s; Bokeh 26.7 / 38.3% and Filter 73.3 / 100% executed.
