

24MP mode with memory pressure: Run 34 (initial Lv3)

Selection protocol. The mechanism-complete traces are Runs 27 and 34. Run 27 starts at Lv5 and is therefore the production MP12 fallback; Run 34 is the only eligible 24MP-mode trace without fallback or a timeout/watchdog failure.

Not a best case. Run / same-Lv3 median ($n = 6$): cumulative pacing 4.39 / 4.23 s; deadline-margin P5 0.30 / 0.33 s; 30-shot span 22.76 / 22.69 s; Bokeh 16.7 / 33.3% and Filter 53.3 / 100% executed.
